

NEW

McCONNEL

DISCAERATOR

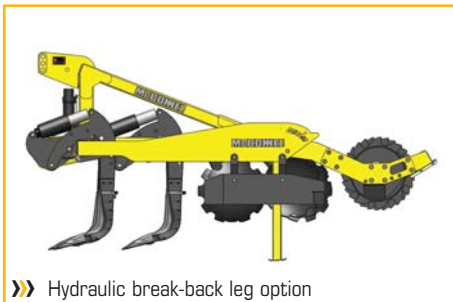

Single pass cultivation from the all **NEW** McConnel Discaerator

The all new McConnel Discaerator combines two rows of large diameter discs with the unique 'low draught design' of McConnel's subsoiler legs, producing deep soil conditioning and an optimum seed bed environment in one pass.

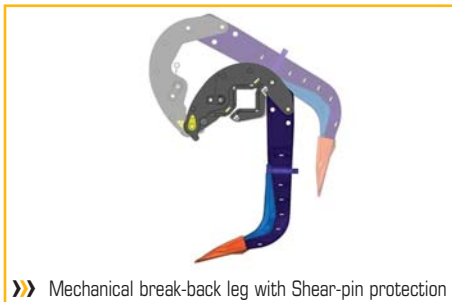

Advantages

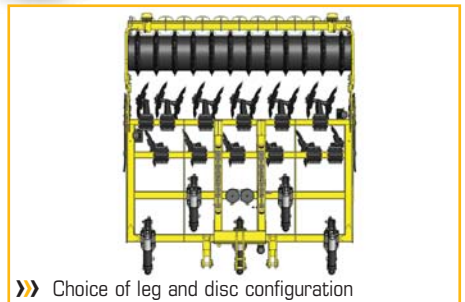

- »» Relieves compaction
- »» Creates seedbed
- »» Improves yields
- »» Save time

»» Hydraulic break-back leg option

»» Mechanical break-back leg with Shear-pin protection

»» Choice of leg and disc configuration

Description		
Working width	Maximum working width	2.8m
Minimum HP Requirement	Dependent on leg configuration	160hp (5 leg)
Weight	Dependent on leg configuration and packer choice	2450kg-2850kg
Replaceable Euroshin	Replaceable shins to protect the legs	Standard
Replaceable Europoint	Choice of standard or wide wing Delta point	Standard
Leg configuration	5 leg or 7 leg configuration	Option
Mechanical Break back legs	Protection by knock through shear pins (4 lives)	Standard
Hydraulic break back legs	Hydraulic protection with auto re-set	Option
Packer Roller	600mm packer roller / 600 or 800mm Ridge packer	Option
Disc's	17 x 508mm dia Concave Serrated Disc (5mm thick)	Standard
Disc configuration	Front row comprises of 6 discs at 500mm spacing at a 15° angle	Standard
	Rear row comprises of 11 discs at 250mm spacing at a 15° angle	Standard
Depth Control	270mm of height adjustment in 30mm increments	Standard
